Main Text Introduction. Over the past two decades, the amygdala has gone from a being an obscure region of the brain to practically a household word (the phonetic ring of the word "amygdala" was the subject of a piece in the New York Times recently). Although known to be involved in emotion for some time (Weiskrantz, 1956), much of the recent scientific interest in the amygdala stems from ...

Learning is the process of acquiring new, or modifying existing, knowledge, behaviors, skills, values, or preferences. The ability to learn is possessed by humans, animals, and some machines; there is also evidence for some kind of learning in some plants. Some learning is immediate, induced by a single event (e.g. being burned by a hot stove), but much skill and knowledge accumulates from ...
