### **History And Physical Examination Current**

A physical examination, medical examination, or clinical examination (more commonly referred to as a check-up), is the process by which a medical practitioner examines the body of a patient for any possible signs or symptoms of a medical condition. It generally consists of a series of questions regarding patient medical history followed by an examination of the symptoms.

The history and Mental Status Examination (MSE) are the most important diagnostic tools a psychiatrist has to obtain information to make an accurate diagnosis. Although these important tools have been standardized in their own right, they remain primarily subjective measures that begin the moment the patient enters the office.

A neurological examination is the assessment of sensory neuron and motor responses, especially reflexes, to determine whether the nervous system is impaired. This typically includes a physical examination and a review of the patient's medical history, but not deeper investigation such as neuroimaging. It can be used both as a screening tool and as an investigative tool, the former of which when ...
