Packet boats were medium-sized boats designed for domestic mail, passenger, and freight transportation in European countries and their colonies, including North American rivers and canals. They were used extensively during the 18th and 19th centuries and featured regularly scheduled service. When such ships were put into use in the 18th century on the Atlantic Ocean between Great Britain and ...

The simplest forwarding model—unicasting—involves a packet being relayed from link to link along a chain leading from the packet's source to its destination. However, other forwarding strategies are commonly used. Broadcasting requires a packet to be duplicated and copies sent on multiple links with the goal of delivering a copy to every device on the network.
