Hubble Deep Field High Resolution

Hubble Deep Field Image at Full Resolution. Download Options. 3069x3006 GIF, 5.9 MB 3069x3006 JPEG, 14.6 MB ... Hubble Deep Field, Hubble Telescope, Observations, Survey. Credits. R. Williams , the Hubble Deep Field Team and NASA. Email list: Inbox Astronomy Servicing Missions Reference Desk eBooks.

HubbleSite: Image - Hubble Deep Field Image at Full Resolution

Within the Hubble Ultra Deep Field there are approximately 10,000 discrete objects. The total field of view represents only 1 ten millionth of the total sky. Most of these objects are very small and likely have masses in the range of 10⁵ to 10⁷ solar masses. Note the mass of the Milky Way galaxy is 10¹² solar masses.

Hubble Ultra Deep Field

Hubble Digs Deeply. These oddball galaxies chronicle a period when the universe was younger and more chaotic. Order and structure were just beginning to emerge. The Ultra Deep Field represents a narrow, deep view of the cosmos, like looking through an eight-foot-long soda straw.

NASA - Hubble Digs Deeply

Galaxies, galaxies everywhere - as far as NASA's Hubble Space Telescope can see. This view of nearly 10,000 galaxies is the deepest visible-light image of the cosmos. Called the Hubble Ultra Deep Field, this galaxy-studded view represents a "deep" core sample of the universe, cutting across billions of light-years.

HubbleSite: Image - Hubble Ultra Deep Field Image Reveals ...

The Hubble Ultra-Deep Field (HUDF) is an image of a small region of space in the constellation Fornax, containing an estimated 10,000 galaxies. The original release was combined from Hubble Space Telescope data accumulated over a period from September 24, 2003, through to January 16, 2004.

Hubble Images High Resolution Wallpaper. Cool Collections of Hubble Images High Resolution Wallpaper For Desktop, Laptop and Mobiles. We've gathered more than 3 Million Images uploaded by our users and sorted them by the most popular ones.

Hubble Images High Resolution Wallpaper - WallpaperSafari

The Hubble Deep Field (HDF) is an image of a small region in the constellation Ursa Major, constructed from a series of observations by the Hubble Space Telescope. It covers an area about 2.6 arcminutes on a side, about one 24-millionth of the whole sky, which is equivalent in angular size to a tennis ball at a distance of 100 metres.

Hubble Deep Field - Wikipedia

I have it hanging up in my college dorm room, and my high school physics teacher had a similar poster hanging in his class room. The poster is of the Hubble Ultra Deep Field, which is a photo the Hubble Space Telescope took. The area of the sky the Hubble was looking at was equivalent to about a single grain of sand held at arms length.

Amazon.com: Hubble Ultra Deep Field - 24"x36" Poster ...

Representing a narrow "keyhole" view stretching to the visible horizon of the universe, the Hubble Deep Field image covers a speck of the sky only about the width of a dime 75 feet away. The field is a very small sample of the heavens but it is considered representative of the typical distribution of galaxies in space.
