In genetics, a mutagen is a physical or chemical agent that changes the genetic material, usually DNA, of an organism and thus increases the frequency of mutations above the natural background level. As many mutations can cause cancer, mutagens are therefore also likely to be carcinogens, although not always necessarily so. All mutagens have characteristic mutational signatures with some ...

Antinutrients commonly found in plant foods have both adverse effects and health benefits. For example, phytic acid, lectins, phenolic compounds (tannins), saponins and enzyme (amylase and protease) inhibitors have been shown to reduce the availability of nutrients and cause growth inhibition, while phytoestrogens and lignans have been linked with infertility problems.

I read in one of Ted's post that lecithin has to be a part of treatment for liver cancer. I also read in another of Ted's posts that silymarin or milk thistle seed extract is very important but he said that if you take too much at first the detox could kill so you have to start a low dose at first and work up.
