

Quadratic Equation Lesson Plan

Quadratic Equation Lesson Plan

This lesson will show how to find the vertex of a quadratic equation. We will also see why this process is so useful to know and apply it to a...

How to Find the Vertex of a Quadratic Equation - Video ...

This lesson will show us how to use the quadratic formula in real-life situations. We'll look at a couple of different real-world examples of when...

Using Quadratic Formulas in Real Life Situations - Video ...

Before you begin Students need to be familiar with exponents. It's helpful if they know how to construct a basic exponential function, but they do not have to have this skill prior to the lesson.

9.7 Quadratics - Rectangles Objective: Solve applications of quadratic equations using rectangles. An application of solving quadratic equations comes from the formula for the area

9.7 Quadratics - Rectangles

Quadratics are algebraic expressions of the form. $ax^2 + bx + c$. Where a, b, and c are all constants (numbers, basically). We are first going to look at factorising quadratics where the number before the x^2 term, a, is 1, and then later (just for the higher students) we will look at how to factorise quadratics where a is something other than 1.. The aim of factorising is to break something up ...

Factorising Quadratics - GCSE Maths Revision - Maths Made Easy

Before you begin Students should have some previous experience with quadratic functions. The vertex form of a quadratic function is used throughout this lesson ($y = a(x - h)^2 + k$), so some previous exposure to this way of writing a quadratic equation will be helpful. Students will also need to use the quadratic formula to find the roots of a quadratic function.
